

# Entegris Announces Plans to Build New Manufacturing Center of Excellence in Colorado Springs

New facility expands U.S. footprint and support to strategic customers in the United States

## AT A GLANCE<sup>1</sup>

Initially supports production for Advanced Materials Handling (AMH) and Microcontamination Control (MC) divisions, which develop **critical products used to manufacture semiconductors**

Targeted to begin initial commercial operations in **early 2025**

**Approximately \$600M** to be invested in construction of facility over several years

New campus to be built in phases, with **100,000 sq. ft** in initial phase

Potential to create **approximately 600** new jobs over several years, doubling Entegris' presence in Colorado, with potential to continue to expand over time

Supported by state and local **incentives**

New facility to include advanced **environmental sustainability** features

Constructed and operated in alignment with 4 pillars of Entegris' **Corporate Social Responsibility** framework: Innovation, Safety, Personal Development and Inclusion, and Sustainability

## WHY COLORADO SPRINGS?

Proximity to customers

Proximity to Entegris Colorado site

Key supply chain resources to optimize supply lines

Strong existing partnerships with state and local government

Business-friendly environment

Talented workforce and strong educational ecosystem

Potential for incentives under U.S. CHIPS and Science Act

As a strategic supplier to the semiconductor industry, we recognize that it is more important than ever to invest in the U.S. to maintain and expand the nation's technology leadership across the semiconductor ecosystem. This investment is a transformational step towards addressing the industry's long-term capacity constraints while building additional supply chain efficiency and resiliency." – **Bertrand Loy, Entegris President and CEO**

## LOCAL AND STATE LEGISLATORS EXPRESS STRONG SUPPORT FOR ENTEGRIS' INVESTMENT IN COLORADO

"Our administration has worked to expand Colorado's technology and advanced manufacturing industries and to create an economy where we foster innovation. We are thrilled Entegris has chosen Colorado Springs for their expansion which will create up to 600 new jobs. Colorado Springs is a great place to live, work and do business, and our state is excited to welcome companies that share our values of community and workforce development and sustainability."

– **Jared Polis, Governor, Colorado**

"We passed the CHIPS and Science Bill to bring semiconductor manufacturing jobs back to America. Thanks to Entegris, Colorado is part of that comeback. This is great news for our tech race with China, the state, and our national security."

– **John Hickenlooper, U.S. Senator, Colorado**

"The past few years have underscored the importance of dependable and secure supply chains based here in America. Thanks to the CHIPS and Science Act and investments to level the playing field for America's semiconductor industry, we are starting to see more companies, like Entegris, bring this critical industry back home. I welcome this announcement, which will bring good-paying jobs to Colorado, support our technological leadership around the globe, and strengthen our national security."

– **Michael Bennet, U.S. Senator, Colorado**
